KENZIE ACADEMY

SOFTWARE DEVELOPMENT | PROJECT BASED TRAINING | INDIANAPOLIS, IN (REMOTE)

APRIL 2020 - APRIL 2021

- Excelled in a 12-month online technical program with a project-based curriculum. Earned front-end and full-stack certs. Productive member of a fully remote team. Flourished in an agile environment that consisted of standups every day with my team, met deadlines with assignments and projects which consisted of 4 team projects & several solo projects, created applications while utilizing virtual environments, authentication systems, & unit testing. Communicated with instructors and peers daily on collaboration platforms such as Slack, Zoom, Google Meet, and GitHub. I became knowledgeable in programming languages, frameworks, debugging, and testing methodologies including Python, Django, JavaScript, React, Debugging Python's PDB, VScode's Python debugger, and Chrome's web developer console. Leveraged project management & design skills to successfully supervise three major group projects. Gained hands-on project experience through leading and completing code reviews, merging pull requests, git conflict resolution, and individual code contributions. Created design, color scheme, & layout for all group projects I was involved in.
- Developed a Twitter clone as the Product Manager, Designer, & developer on a 3- person project team where I cocreated features like authentication, following other users, liking or unliking tweets, adding a profile image, posting tweets, & tagging others. Created maintainable, reusable UI components with React + Redux, bootstrap, & back-end API.
- Developed a Recipe app called Garnish as a Product Manager, Designer, & developer on a 4-person team where I handled authentication & user experience. Our users had the option of adding links to other social media accounts, images, & other detailed info to customize their profile as well as saving recipes & adding them to favorites. Used Django, food-API from spoonacular, & bootstrap.

PAMELA WILLIAMSON REAL ESTATE TEAM

SEO/CONTENT & ADMIN

2012 - 2019

- Maintained each client's personal website, blog, social media & MLS real estate site. Wrote original content for all sites
- Provided customer service for brokers & clients when necessary
